

In the Claims:

1. (original) A miniature rheometer for analyzing a small quantity sample, comprising:

 a first plate and a second plate, forming a pair of plates having a known geometry for confining the sample between the plates, said sample having a volume of 200 microliters or less;

 an adjusting device for adjusting the separation of the plates;

 an actuating element mechanically coupled to the first plate, which produces a shear strain within the sample by generating a defined small scale relative motion of the first and second plates;

 a sensing element which outputs a position signal indicative for a displacement of at least one of the first and second plates; and

 a feedback circuit for providing force rebalance of the force applied to the sample by the small scale relative motion of the first and second plates on the basis of the position signal,

 wherein an amount of force rebalance is a measure for the shear stress within the sample.

Claims 2-77: Cancelled

REMARKS

Please cancel claims 2-77 before examination of this application. Should the Examiner have any questions or wish to further discuss this application, Applicants request that the Examiner contact the undersigned at (248) 593-9900. If for some reason Applicant has not requested a sufficient extension and/or have not paid a sufficient fee for this preliminary amendment and/or for the extension necessary to prevent the abandonment of this application, please consider this as a request for an extension for the required time period and/or authorization to charge Deposit Account No. 50-0496 for any fee which may be due.

Respectfully submitted,

Dated: April 31, 2004
